

Engineering

Research and development
protect our technology lead

Feintool is for ever setting new market standards in fineblanking technology. This requires a constant commitment to research and development. In the field of theoretical research Feintool collaborates with prestigious universities, international institutions and technical colleges. New findings – for example in materials technology – are integrated directly into the development processes. The highly qualified development teams at Feintool are made up of experts from many disciplines. This is necessary in order to explore the complex interrelations between material, tool, machine, lubricant and coating, and to translate the results into new customized solutions.
