

Customer Training

We bring technology to the customer

We offer you as a Feintool customer specially tailored training for your employees. Our trainers at the Feintool Training Center in Lyss are at your service. We will also be glad to carry out training locally at your company, geared to your own specific problems.

Our technical experts can help you with questions relating to the entire process chain, covering everything from parts design, materials for tools and parts, to lubricants.

We can also advise you in matters of process optimization, machine operation and preventive maintenance.
