

Investor Relations

All important financial information for you

As world market leader in fineblanking technology, Feintool is the only global supplier to offer its customers the entire process of fineblanking, from engineering through tool design to the mass production of fineblanking components. Besides its core technology of fineblanking/forming, Feintool offers reliable automation systems as well as automated feeding and handling components under the IMA and Afag brands, and is world market leader for riveting machines with BalTec.

Comprehensive information on Feintool shares and active stock-exchange trading are very important to us in order to strengthen confidence in our company among investors and shareholders in the long term.
