

Feintool

System Parts Division

Manufacture of low-cost system parts

Feintool System Parts is the only company active throughout the world that uses fineblanking technology to produce precision system components and modules. With plants and technology centers in Europe, the USA and Japan, Feintool supports all the standard platform strategies used in the automotive and electronics industries.

The major services we provide include:

- Working together with customers to explore process limitations
- Improving processes
- Optimizing designs
- Defining materials that meet specifications and perform flawlessly when used in production.

Our customers include countless well-known system manufacturers. Their value-added percentage keeps increasing – as does our responsibility for our joint success.
